# WELCOME

- eENVplus (eENVironmental **services for advanced applications via INSPIRE** [www.eENVplus.eu](http://www.eENVplus.eu)) is a project co-funded by the European Commission under the Competitiveness & Innovation Framework Programme 2007-2013, coordinated by GISIG.
- eENVplus aims is to **unlock the vast amounts of environmental data** managed by national & regional environmental agencies and other public & private environmental stakeholders, through integration and harmonization of existing services.

- The aim of the workshop is to allow **closer connection** of eENVplus in the Hellenic context and to strengthen the involvement of national stakeholders linked to tangible and practical points of vision.
- The workshop, also, includes a **training session** on the use of the eENVplus Toolkit for data and metadata INSPIRE harmonization and validation.
- Today, **key note** speakers will present the current status and examples of INSPIRE implementation in Greece.

Let the eENVplus Workshop begin!
