

eENVplus - eEnvironmental services for advanced applications within INSPIRE

CIP - Pilot Actions

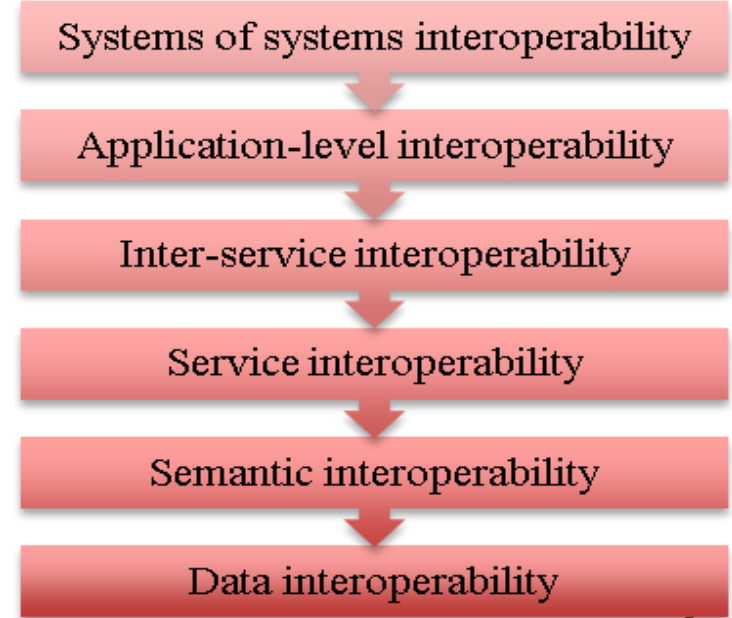

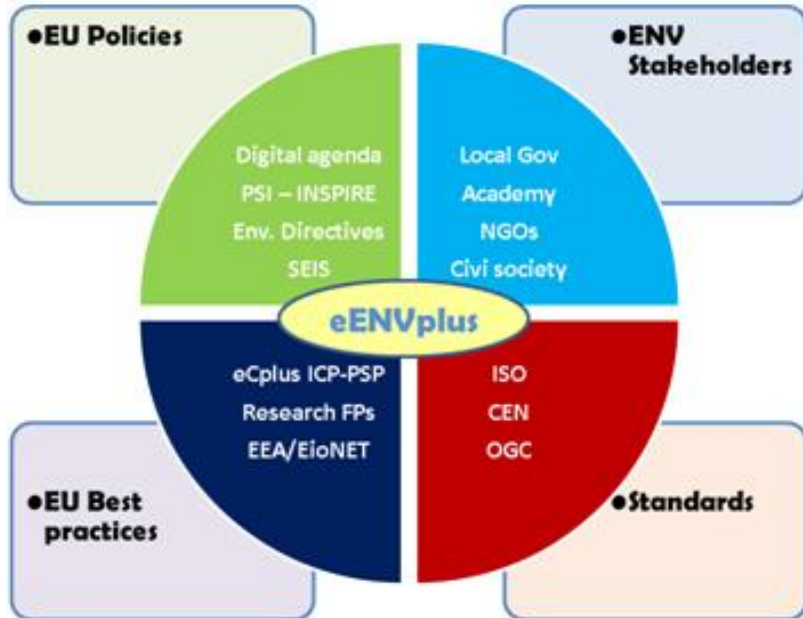

Grant agreement no: 325232

Starting date: 01 January 2013

Giorgio Saio
GISIG

Key objective

- to support INSPIRE and SEIS implementation
- through deployment and integration of value-added eEnvironment services
- available at national level and through past/on-going key EC-funded project
- eENVplus provides Members State and the GI Communities, with tools addressing a **multi-level interoperability stack**:

- The provision of an **interoperable** solution to share and process geo-spatial data in order to provide added value information and services to be shared in a cross-language, cross-scale and cross-thematic environment
- The provision of **re-usable** solutions, in term of open data, open services, open components, open infrastructures, open applications
- The **contribution to the European policies** and international standards in the frame of the European eGovernment actions, with a special attention to the EU Directives like INSPIRE, PSI, the Environmental Directives (Air, Water, Habitas, Flood, Waste, etc.) based on the best practices coming from the application in real and heterogeneous contexts of the eENVplus infrastructure.

eENVplus European projects background

- **NESIS** - A Network to enhance a European Environmental Shared and Interoperable Information System (ICT PSP project)
- **NATURE-SDIplus** - Best Practice Network for SDI in Nature Conservation (eContentplus project)
- **BRISEIDE** - Bridging services, information and data for Europe (ICT PSP project)
- **OneGeology Europe** - Making digital geological spatial data more easily discoverable, accessible and useable
- **HUMBOLDT** - Towards the Harmonisation of Spatial Information in Europe (FP6 GMES project)
- **CAFE** - Development and demonstration of technical IT solutions for data exchange and reporting under the CAFE Directive using INSPIRE services”
- **VESTA-GIS** - Development of a training infrastructure (LdV)

■ National Agencies:

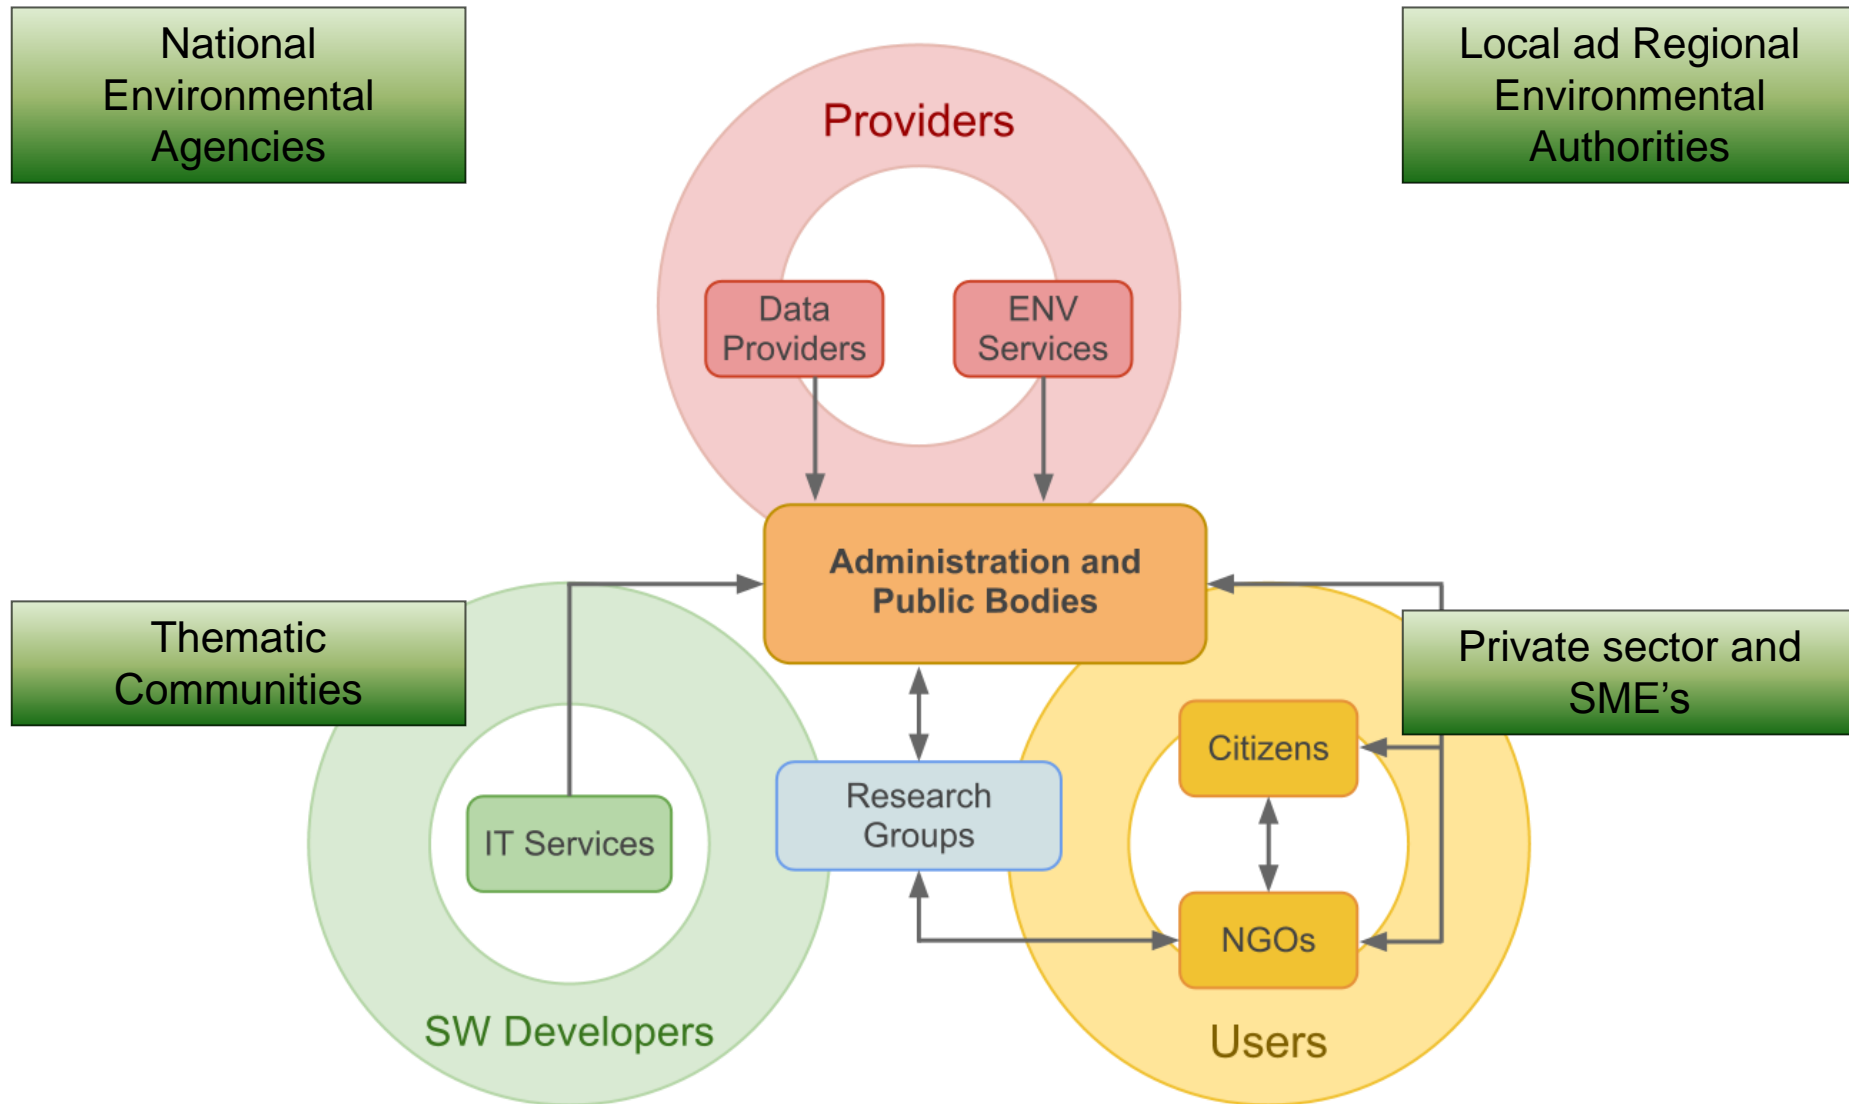

- Environmental Agencies: VMM (BE), ISPRA (IT), CENIA (CZ), SAZP (SK), MRD (HU) with support of GEO (HU); moreover, EPSILON in close cooperation with GR EA
- Mapping Agencies: DGT (PT), NLSI (IC, in close cooperation with IC EA)
- Thematic Agencies: Geological (GeoZS, SLO), Nature (ATEN, FR)

■ **Technical partners:** CNR-IMATI, Epsilon, Sinergis, Graphitech, disy, EPSIT, PKH

■ **University:** GEO

■ **Standardization Body:** GIST (Secretary of CEN TC/287 Geographical Information)

■ **European Association:** GISIG (eENVplus Coordinator)

Pilots / Scenarios / Use Cases

- In 10 pilots, 3 cross-border
 - Pilots (10): the actual implementation of the scenarios in a geographical area
 - Scenarios (9): the different use cases considered by eENVplus, which the applications correspond to
 - Use Case (26): a methodology used in system analysis to identify, clarify, and organize system and user requirements
-
- Offering examples on how the eENVplus outcomes can be utilized in a variety of different situations (ENV aspects) and users' needs
 - Providing streamline of the tools available to the project into the main flow of INSPIRE compliance
 - Proposing interoperability among applications (existing or planned)
 - to create a more complete thematic (integration among complementary issues) or regional example (integration among cross-border cases)

Pilots in Belgium and Italy

SEIS for air quality data.

Pilot in France

Natural Areas INSPIRE
Compliance Toolbox.

Pilot in Iceland

INSPIRE Geoportal.

Pilot in Belgium

Utility services, the case of
sewage networks in
Flanders.

Pilot in Greece

Forest Fire
Management.

Italy-Slovenia cross-border pilot

Geological Map
Harmonization in Italy
and Slovenia.

Czech-Slovak cross-border pilot

Csspire (Everyday life issues
connected to Environmental
aspects).

Hungary-Slovakia cross-border pilot

Window on the Protected
Areas- Mobile
Conservation Map.

Pilot in Portugal

Urban Landuse Planning.

Underlying content, INSPIRE data Themes

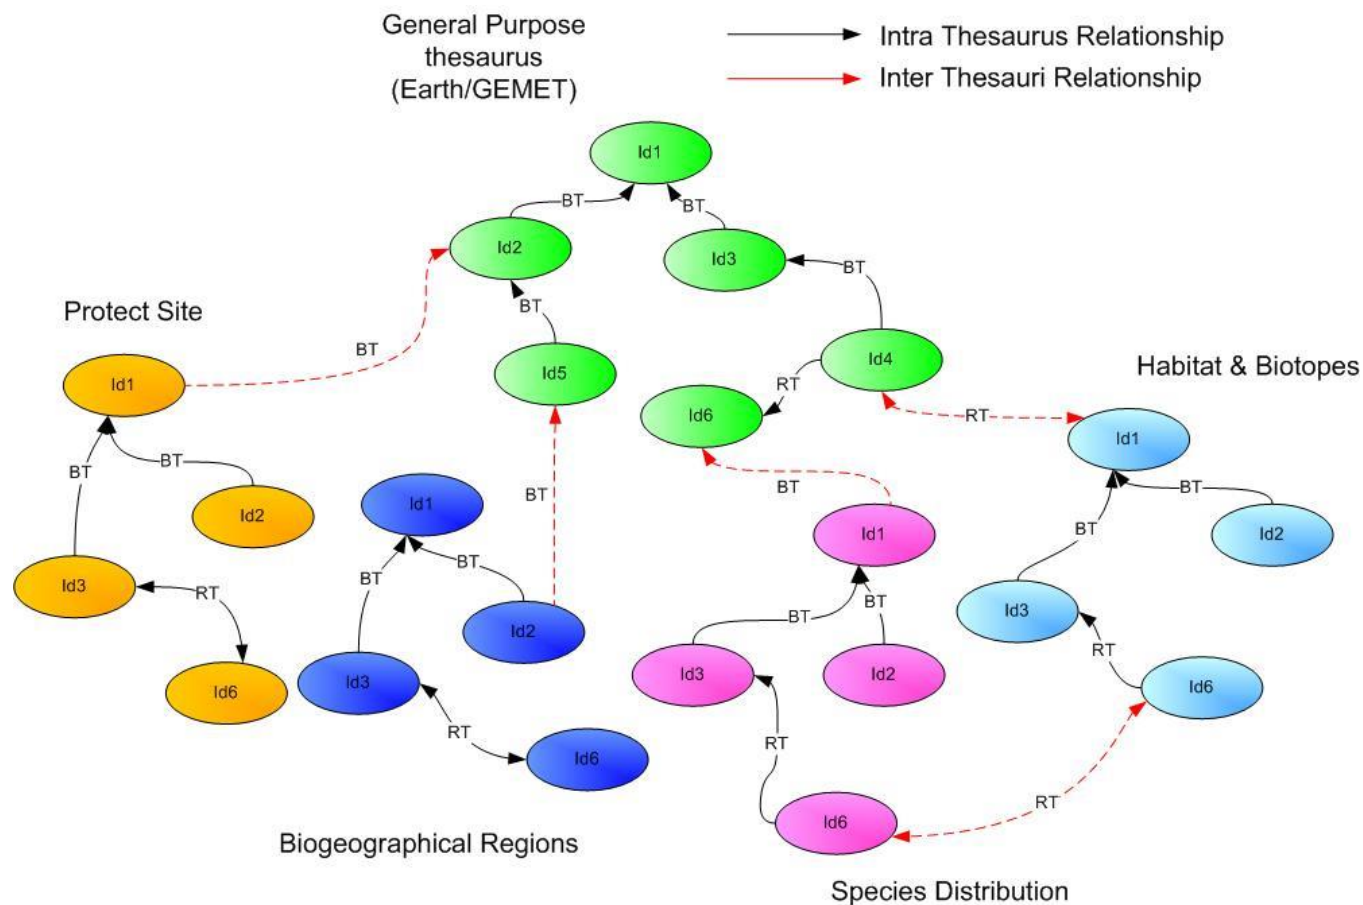

- Various National datasets related to many INSPIRE Annex I-II-III Data Themes, are considered for eENVplus (some are under IPR, many are Open Data)
- After the 1st data analysis, not all of them will be harmonised

Pilot Applications: EP01 EP02 EP03 EP04 EP05 EP06 EP07 EP08 EP09 EP10										
ANNEX I										
1. RS: Coordinate reference systems										
4. AU: Administrative units										
6. CP: Cadastral parcels										
8. HY: Hydrography										
9. PS: Protected sites										
ANNEX II										
2. LC: Land cover										
3. Ol: Orthoimagery										
4. GE: Geology										
ANNEX III										
1. SU: Statistical units										
4. LU: Land use										
5. HH: Human health and safety										
6. US: Utility and governmental services										
7. EF: Environmental monitoring facilities										
8. PF: Production and industrial facilities										
11. AM: Area mng/rest/reg zones & rep. units										
12. NZ: Natural risk zones										
13. AC: Atmospheric conditions										
14. MF: Meteorological geographical features										
17. BR: Bio-geographical regions										
18. HB: Habitats and biotopes										
19. SD: Species distribution										

The HUMBOLDT Alignment Editor

- The HUMBOLDT Alignment Editor (HALE) is a tool for defining and evaluating conceptual schema mappings.
- HALE is currently being used intensively in the context of the eENVplus “WP3 Harmonisation and Validation” tasks.
- The Data Harmonisation Panel:
 - Supports a community of experts and organisations that have to deal with spatial data harmonisation.
 - Disseminates and exploits the HUMBOLDT Tools.
 - GISIG is one of the Data Harmonisation Panel Founding Members.
- A joint collaborative initiative between the eENVplus project and the Data Harmonisation Panel is under development.

- integration of different available thesauri
- cross walking from a thesaurus to another

- eENVplus infrastructure is composed by a set of components combined into the nodes of the infrastructure

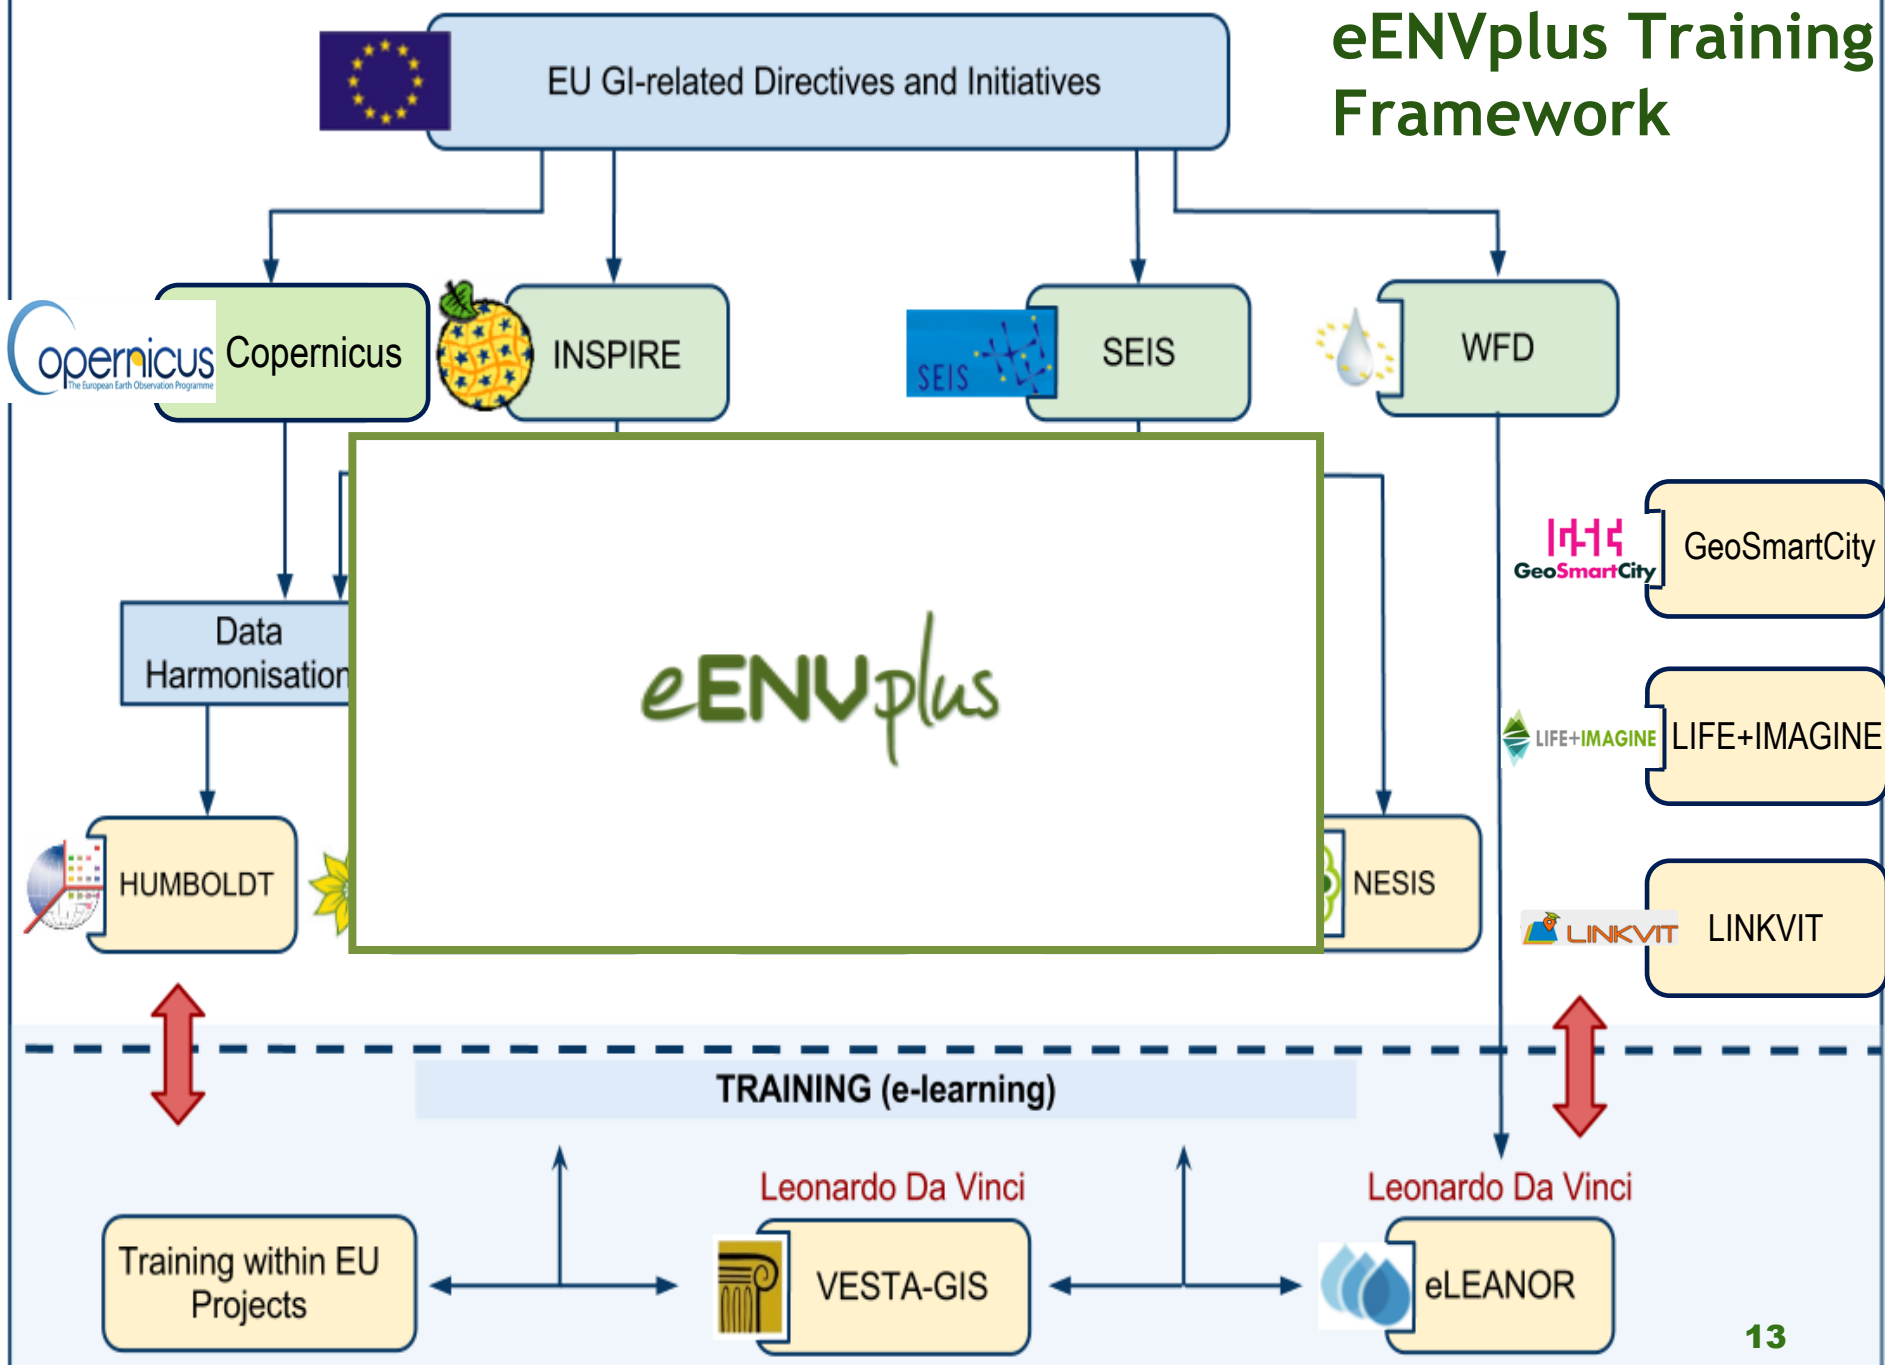

Software components

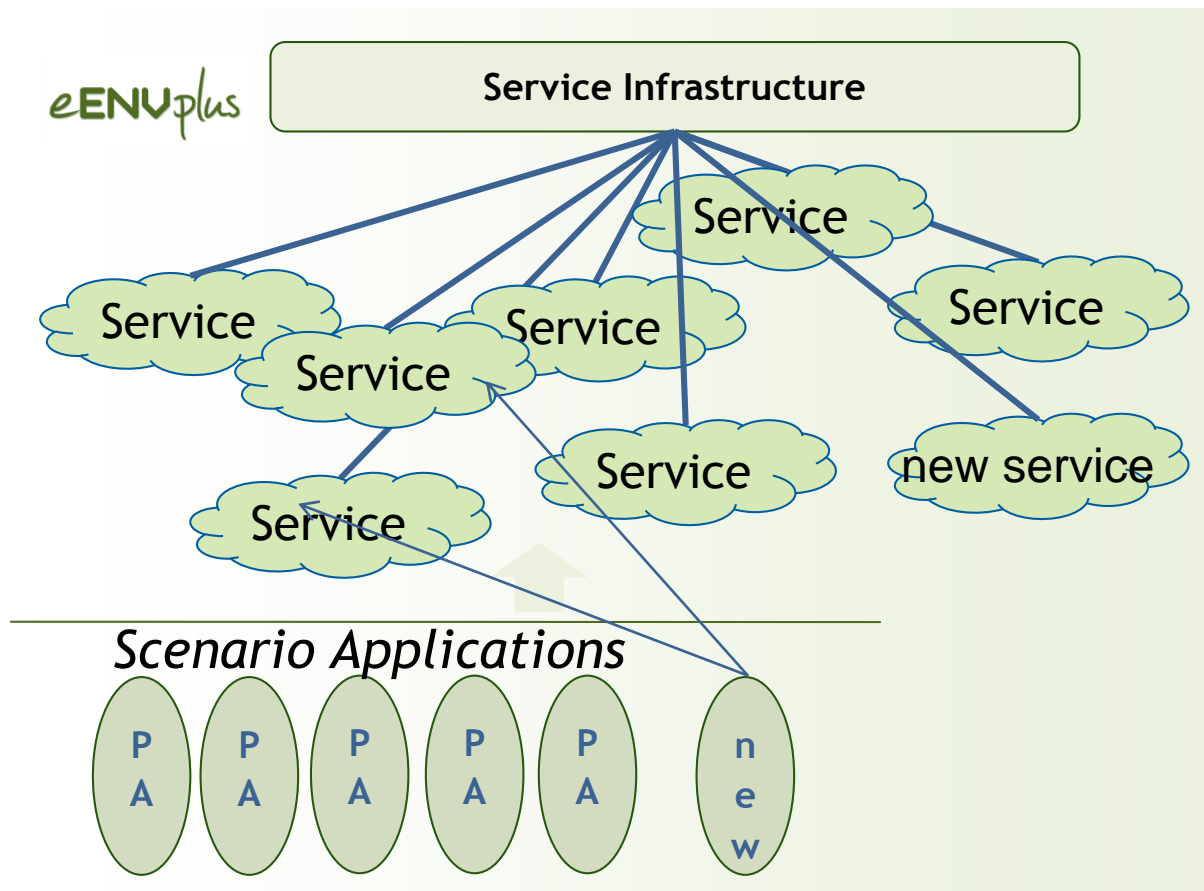

Data structure components

eENVplus Training Framework

- eENVplus Infrastructure is the base for including new applications and new services also within future projects at a European and National level

- eENVplus will be then the Framework for implementing/use/sharing eEnvironmental services

GeoSmartCity

new service

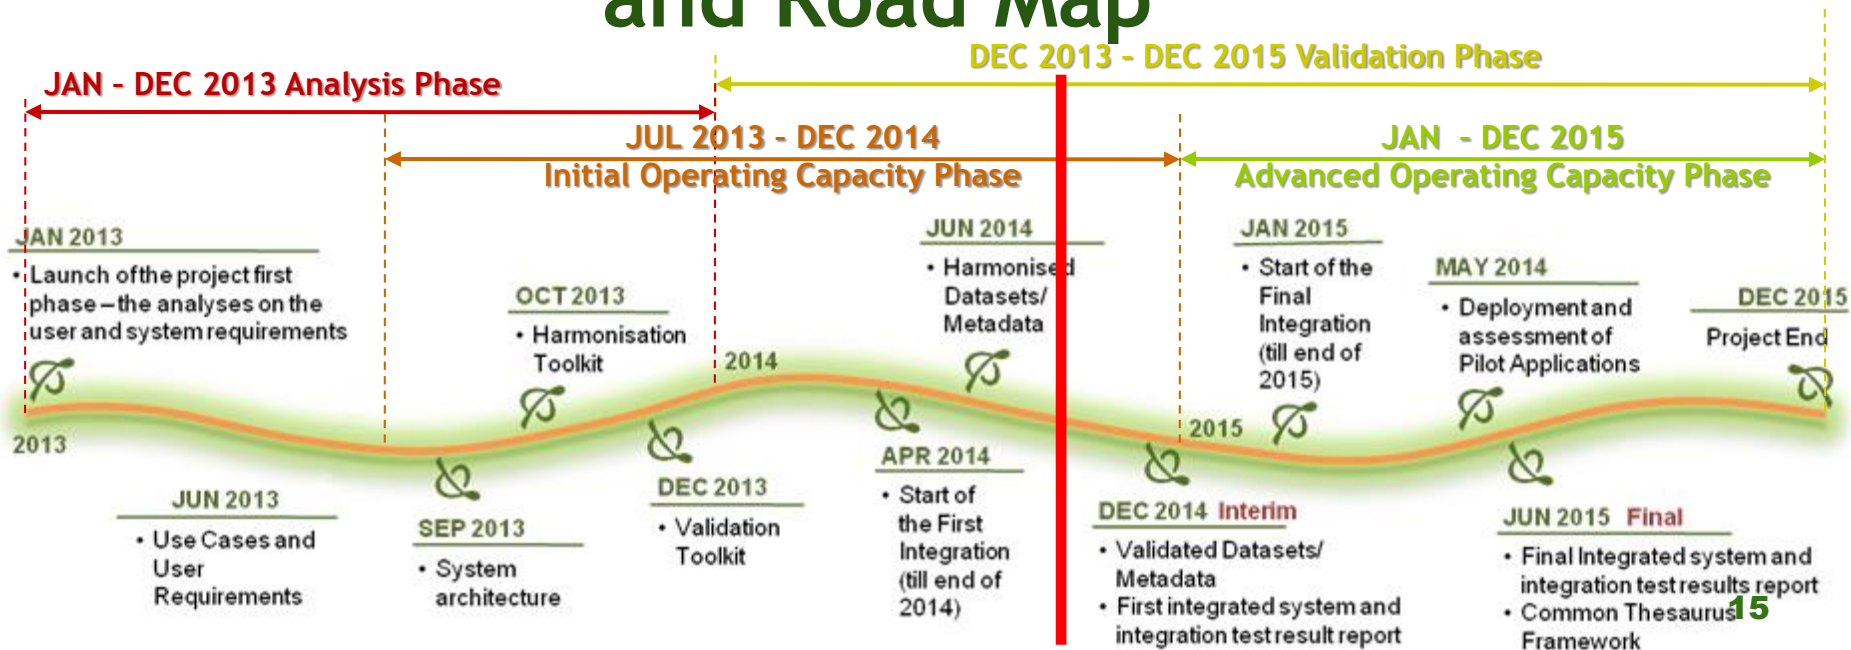

LIFE+IMAGINE

- That will be part of the long term sustainability plan after the project conclusion

Macro-actions foreseen by eENVplus

and Road Map

Thanks for your
interest in eENVplus !
